## How do you make an ez bow maker

Single Ribbon Bow Tutorial This bow tutorial was done with scrap ribbon that may no longer be available on the website, so please pay no attention to the style of ribbon))) This tutorial is just to show you how easy it is to make a pretty bow using wired ribbon and the EZ Bowmaker. Supplies EZ Bowmaker Ribbon Any style of 2.5" wired ribbon Summary Use the markings on the EZ Bowmaker to make tails the desired length. Start with the desired length of tail and slide ribbon into the two pegs. Pull the tail toward you to get it out of the way. Twist the ribbon to get the right side up to make the first loop. Make a loop 5" and continue to twist to get right side up. Make three loops 5" in width on each side. Next make two loops at 4" in width. Two on each side. Make the last loop 4" in width which will be a center loop. Press the stack of ribbon down as tightly as you can. Ease your fingers under the stack keeping it straight. Slip a zip tie around the stack (in the center) and start to pull the zip tie from the underneath side. Before you pull it tight, slide a chenille stem or floral wire under the zip tie. The chenille stem will be used to secure the bow to your wreath or wherever you are placing it. Pull the zip tie tight and snip off the ends with wire cutters. Fluff the bow. That's it! You're done! You can make almost any size bow with the EZ Bowmaker and you can use one ribbon, or as many as you like. You can make other styles of bows too. It's easy! The EZ Bowmaker. Get yours at Trendy Tree today and shop for ribbon. We have hundreds and hundreds of styles of ribbon to choose from. Visit our YouTube channel for more bow making tutorials! \*This post contains affiliate links. If you struggle hand tying a bow, you might want to try the EZ Bow Maker. I pulled it out of the box and immediately started making professional bows to use in your wreaths or decor. Today we're going to play with the EZ Bow Maker to learn how to make bows!This post may contain affiliate links for your convenience. Click here to read my full disclosure policy. Making bows is easy with the EZ Bow Maker! I'll show you how to use it to make fun easy bows for your home projects. [Tweet "Ways to use the EZ Bow Maker for Wreath Bows"] Supplies EZ Bow MakerHammer or rubber malletWired ribbonWireScissorsWire CuttersHot Glue PanGlue Sticks Steps for Using the EZ Bow Maker for Easy Bows Step 1 - Setup EZ Bow MakerBegin by setting up your EZ Bow Maker. Follow the instructions to hammer in the wooden dowels with a hammer or rubber mallet. Step 2 - Make Bow Option 1 Unroll approximately 7 yards of wired ribbon. Then place a piece of wire across the EZ Bow Maker next to the middle wooden dowel. Measure out an 8-inch tail and lay the ribbon on the EZ Bow Maker. Then measure out 5 inches for a loop and bring it back between the dowels while twisting the ribbon. Next measure out a loop on the other side and once again bring it back between the dowels and twist. Once you have three 5 inch loops on each side, make four 4 inch loops on each side, once again twisting as you bring it back between the dowels. Next, bring the wire to the front and lift the bow out of the bow maker. Fluff and shape the bow loops and then twist the wire to tighten in the back. Step 3 - Make Bow Option 2 (Funky Bow)Measure and cut 30-32 inch ribbon strips. Place piece of wire through the center of the EZ Bow Maker. Lay out one ribbon strip through the center dowel, measure out 6 inches on one side to make a loop and twist through center dowel. Do the same with the next piece of ribbon on the other side. Continue making ribbon loops with each ribbon strip rotating side to side. I used two of each style of ribbon, using the wider ribbon first, then finishing with the 1.5-inch wide ribbon. Next, bring the wire to the front and lift the bow out of the bow maker. Fluff and shape the bow loops and then twist the wire to tighten in the back. Step 4 - Make Bow Option 3 (Mardi Gras Ribbon)Thread a piece of wire through the center of the EZ Bow Maker. Start with widest ribbon and thread through the middle dowel, making an 8-inch bow loop on one side. Thread back through the middle, twisting as you go, and make an 8-inch loop on the other side. Continue until you have three loops on each side. Next, change ribbons to one more narrow (I used gold) and make 6-inch loops as you go, following the same process as above. Finish by using your narrowest ribbon (for mine it was purple) and make 4-inch loops as you go. Next, bring the wire to the front and lift the bow out of the bow maker. Fluff and shape the bow loops and then twist the wire to tighten in the back. Step 5- Finishing TouchesTo make any of your bows extra special, hot glue picks that fit your colors or theme between or inside bow loops. Watch the video for making Wreath Bows with the EZ Bow Maker Save Save Save Save Save As you can see there are many different styles of bows you can make with the EZ Bow Maker. This tool should be especially helpful for those who find it difficult to hold the ribbon tightly in your hand while making your bow. Learn to hand tie more bows in this free video here.
